ABOUT

.NET developer at heart. With **10+ years of experience** in C#, ASP.NET MVC, and .NET Core, I architect and deliver robust, scalable enterprise applications — from clean API design and data layers to cloud infrastructure on Azure. My foundation is deep backend engineering: performant, maintainable, production-grade code.

Over the past **7+ years**, I have built a strong specialization on top of that .NET core: the **Sitecore ecosystem** — Helix/Habitat architecture, SXA, JSS (Headless CMS), Sitecore Commerce, and Personalization — delivering CMS solutions for global enterprise clients. Sitecore runs on .NET, and understanding the platform at its deepest level is what sets me apart.

Currently at **EPAM Systems**, I serve as the primary technical point of contact for enterprise clients — leading architectural decisions, Azure cloud deployments, and root-cause analysis on critical systems. I also build **PowerShell automation** for Sitecore operations — log analysis, layout management, and environment maintenance — reducing manual overhead and keeping environments healthy. Beyond code, I act as a trusted technical advisor and actively **mentor developers**: conducting code reviews, guiding onboarding, and promoting a culture of continuous learning across the team. Over the past year I have integrated **AI-assisted development** (Claude / Claude Code) into my daily workflow — accelerating code generation, refactoring, and documentation while personally reviewing and validating every change before it lands in production.

EXPERIENCE

- Senior .NET Developer**
EPAM Systems
May 2022 – Present
Cancún, Mexico (Remote)
 - Primary technical point of contact** for multiple enterprise clients, leading root-cause analysis, technical roadmap discussions, and feature design for mission-critical Sitecore applications.
 - Architected and developed custom **Sitecore solutions using Helix, SXA, JSS, and Sitecore Personalization**, ensuring performance, scalability, and long-term

SKILLS & EXPERTISE

C# & .NET Core Expert · 10+ yrs
Sitecore CMS Expert · 7+ yrs
ASP.NET MVC / Web API Expert · 8+ yrs
Azure Cloud Advanced · 5+ yrs
AI / Claude API / MCP Advanced · 2 yrs

maintainability.

- Proactively proposed and evaluated multiple technical solutions per client request, clearly outlining trade-offs, risks, and implementation strategies — accelerating decision-making cycles.
- Deployed, configured, and managed **Azure resources** (App Services, Azure Functions, Storage, SQL), maintaining high availability and security across all environments.
- Monitored application health, validated infrastructure stability, and coordinated rapid incident response — reducing client-reported downtime.
- Produced comprehensive technical documentation for knowledge transfer, onboarding, and client audits.
- Built and maintained **PowerShell automation scripts** for Sitecore environments — automating log analysis, layout management, reference cleanup, and IP-range configurations — significantly reducing manual operational overhead.
- **Mentored engineers** across the team: conducted code reviews, facilitated knowledge-sharing sessions, and actively supported onboarding of new developers — fostering a culture of continuous learning and technical growth.
- Used **Azure Application Insights** and the **Sitecore Pipeline Profiler** to diagnose performance bottlenecks, monitor application health in real time, and drive targeted optimizations across Sitecore environments.
- Adopted **AI-assisted development** (Claude / Claude Code) over the past year to accelerate engineering workflows — code generation, refactoring, documentation, and analysis — maintaining full review and validation of every change before integration.

Senior Sitecore Developer (Independent)

Apr 2020 – Apr 2022

Freelance / Contract Projects

Remote · Part-time / Parallel to Vanco role

- Designed and delivered end-to-end **Sitecore CMS solutions** for clients across multiple industries, following Helix architecture and Sitecore best practices.
- Built and integrated **headless CMS components** via custom REST APIs and the Sitecore JSS framework, enabling decoupled front-end architectures.
- Provided strategic technical consulting for Sitecore upgrades, SXA implementations, and personalization initiatives.
- Managed full project lifecycle independently: requirements, scoping, development, QA, delivery, and documentation.

Senior Software Development Engineer

Apr 2020 – May 2022

Vanco Payments · SmartCare (Business Unit)

Cancún, Mexico

- Built and maintained enterprise web apps using **C#, ASP.NET MVC, .NET Core, Web API, Angular, and React**.
- Integrated **Azure Functions** and event-driven cloud services to support scalable, asynchronous workflows in a multi-tenant architecture.
- Authored and maintained **NUnit unit and integration tests**, raising code quality and reducing regression risk.
- Defined and rolled out a **Git branching strategy** adopted company-wide, improving collaboration and release velocity.
- Contributed actively to **Azure DevOps CI/CD pipelines**, enabling automated builds, tests, and deployments.

Software Development Engineer in Test (SDET)

Apr 2018 – Apr 2020

Vanco Payments – ASAP

Cancún, Mexico

- Designed and implemented a **centralized automated testing framework** used across multiple products, standardizing regression coverage company-wide.

ANTHROPIC ACADEMY

 In Progress — Claude Certified Architect

AI Fluency: Framework & Foundations 10 / 10

Anthropic · Apr 2026

- Implemented **application monitoring and observability** using ELK Stack and MongoDB, enabling proactive production issue detection.
- Defined, documented, and rolled out a new **QA process** improving consistency and software quality across teams.
- Developed and maintained **Azure DevOps CI/CD pipelines** for automated test execution and deployment workflows.

QA Automation Engineer / Senior QA

BestDay.com

Jun 2015 – Apr 2018

Cancún, Mexico

- Planned, designed, and executed test strategies for web and mobile applications (iOS), driving early adoption of mobile automation.
- Developed automated test scripts with **Selenium**, expanding regression coverage and reducing manual testing effort.
- Defined QA policies, testing standards, and technical procedures to ensure data integrity and system reliability.

Junior Software Developer (PHP)

MayanAccess

Aug 2016 – Sep 2017

Cancún, Mexico

- Developed data management web applications using **PHP** and SQL Server, supporting internal business processes.
- Designed and executed SQL scripts to process and manipulate large data volumes efficiently.
